Collection Notes:

- (1) Collect samples in sterile whirl-pak bags that are filled to at least the 100ml line (marked on bag)
- (2) Date and time of collection must
See a demonstration of whirl-pak use on our website: <http://wyagric.state.wy.us/divisions/asl>
- (3) One extra whirl-pak of sample must be included and labelled "TC" to be used as a temperature control at the laboratory.
- (4) Samples must be received cold (between 0-4.5°C/32-40.10°F) within 60 hours of sampling.
- (5) Samples must not be leaking or frozen.
- (6) Samples may be hand delivered or shipped on ice. Samples should be separated from ice packs using newspaper or cardboard to keep samples from freezing.

* Samples for these tests may be combined in one whirl-pak

** Testing for Capmylobacter requires the laboratory purchase additional testing products and price is negotiated at time of order
