**ASSAIL® 70WP INSECTICIDE**

**FOR USE ON ALFALFA GROWN FOR SEED**

This label is valid until January 19, 2022 or until otherwise amended, withdrawn, cancelled, or suspended.

**ACTIVE INGREDIENT:** acetamiprid

(E)- N\(^1\)-(6-chloro-3-pyridyl)methyl-N\(^2\)-cyano-N\(^1\)-methyl acetamidine .................................................. 70.0% by wt.

**OTHER INGREDIENTS:** .................................................................................................................. 30.0% by wt.

**TOTAL** ....................................................................................................................................... 100.0%

EPA Reg. No.  8033-23  

EPA SLN No. WY-170001

**ENVIRONMENTAL HAZARDS:**
This product is toxic to wildlife. This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are visiting the treated area. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate. Do not contaminate water used for irrigation or domestic purposes.

**DIRECTIONS FOR USE**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This supplemental label and the federally registered label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this supplemental label and the main EPA registered label.

Spray volume: Apply in a minimum finished spray volume of 20 gallons per acre by ground and 10 gallons per acre by air. To achieve optimum pest control, it is important to obtain thorough and uniform spray coverage.

For use under this SLN label, do not apply this product through any type of irrigation system.

SPECIAL CROP USE RESTRICTIONS:
Do not cut current year’s treated alfalfa seed crop for hay or forage. Do not graze current year’s treated alfalfa crop. Do not use treated alfalfa seed for sprouting.

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a non-feed/non-food use. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed. This restriction pertains to, but is not limited to, green chop, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, screenings must be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes.

Any seed from a field treated with this pesticide product must bear specific and conspicuous container labeling or if shipped in bulk, on the shipment invoice or bill of lading. The labeling must contain the following statement:

“This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration and other regulatory agencies.”

RESISTANCE MANAGEMENT:
Acetamiprid is the active ingredient in ASSAIL® 70WP Insecticide. It is a member of a class of chemicals known as neonicotinoids. Rotating ASSAIL® 70WP Insecticide with pesticides with different modes of action may delay or prevent development of insecticide resistance. The use of ASSAIL® 70WP Insecticide should conform to resistance management strategies established for the use area. Consult your agricultural advisor, university contact or extension service for recommended pest management practices for your area. Use recommended integrated pest management practices so that you are not relying solely on chemical control in your crop production.

ASSAIL® is a registered trademark of Nippon Soda Co., Ltd.
