<td>12 – 16</td>
<td>Onager Optek is active against all immature stages of Tetranychid spider mites, including freshly laid eggs. Therefore, it is important to apply Onager Optek prior to adult mite buildup. Scout and apply early when mites first begin colonizing the upper 1/3 to ½ of the plant canopy. An early application timing and thorough coverage are essential for acceptable control. Apply Onager Optek by ground in a minimum of 20 gallons of water per acre at a minimum of 35 psi to insure optimum coverage.</td>
